

EMAIL SECURITY

Not to sound like a broken record but, **scammers** continue to use email to carry out their schemes

because email works.

Phishing, Ransomware, Malware, Social Engineering, Business email compromise (BEC) are all ways cybercriminals seek to gain information or access to your organization through emails.

A fishing hook with a red, white, and blue bobber is suspended in clear blue water. Three goldfish are swimming around the hook, looking at it with interest. The scene is set against a background of water with bubbles and a light blue gradient.

Dont take the Bait!
