

FULLY INTEGRATED SECURITY SOLUTIONS

HELPING TO DETECT, RESPOND, AND MITIGATE POTENTIAL CYBER ATTACKS IN REAL-TIME

MANAGE RISK WHILE REDUCING COSTS

Security solutions should work together to minimize cyber threats. At Loricca, we make protecting your assets a straightforward and easy-to-understand model focusing on five critical components.

IDENTIFY

PROTECT

DETECT

RESPOND

RECOVER

Loricca's managed security services provide the broad security expertise, continuous monitoring, dashboard visibility, and industry-leading tools and processes you need to keep your data and critical IT systems safe and protected.

We provide a solution tailored to address your business requirements, technologies, and processes.

SOLUTION CAPABILITIES

- ✓ Cloud Compliance Monitoring
- ✓ Cybersecurity Awareness Training
- ✓ Vulnerability Management Services
- ✓ Backups and Disaster Recovery

280 DAYS

The average time it takes to identify and contain a data breach is 280 days (approximately nine months).

FOCUS ON YOUR BUSINESS NOT MONITORING DAILY SECURITY LOGS

Security breaches are costly. Loricca specializes in security management for organizations across a variety of industries. Our mission is to protect our customers from cybersecurity risks by partnering with their in-house IT experts to build and manage a strong security risk management program.

Our Security Operations Center (SOC) continuously monitors your cloud infrastructure and applications and prioritizes alerts based on in-depth investigation and validation of suspicious activity.

Since 2004, Loricca has been a leading provider of cybersecurity and risk management solutions.
